

SuperMenuHorizontalTop

You can customize menu using the live editor.

Select the element you want to edit in the list dropdown below.

You can add a custom css file for each shop in multishop context if you want.

In the folder `modules/supermenuhorizontaltop/views/css/customshop/`

create a file named like this : `supermenu-shop{ID_shop}.css`

Example : if you want to add a custom css file to the shop with the ID 3,

name the file `supermenu-shop3.css`

It will be automatically load on shop3.

If you have questions or suggestions, please contact developer.
